**To Whom It May Concern,**

**EFFICIENCY CONTROLS FOR THE INSTALLED ESE LIGHTNING CONDUCTOR, PROTECTOR by DLP SYSTEMS.**

DAMEKS was founded in 1969. As being 39 year old establishment, DAMEKS is one of the outstanding lightning protection, grounding, power transfer service provider company in Turkey.

The inner elements of the Protector are rust free and the material suppliers state a minimum lifespan of 30 years with no maintenance.

All the finished products go through a strict quality control procedure before the delivery to the customers.

According to the given information and the metal restrain that is triggered by the severe discharge activities, Dameks can state that Protector by DLP Systems units maintain a lifetime up to 30 years. This statement is fully dependant upon the given installation and maintenance instructions are properly followed.

Which are:

- The annual control and maintenance of the Protector unit itself, the proper grounding and the conduction system.
- The proper installation according to the standards.

Onome kome može poslužiti,

**KONTROLA EFIKASNOSTI ZA INSTALIRAN ESE, GROMOBRAN SA UREĐAJEM  
ZA RANO STARTOVANJE, PROTECTOR od DLP SISTEMA**

DAMEKS je osnovan 1969. godine. Kao 39 godina stara ustanova, DAMEKS je jedna od istaknutih kompanija za pružanje usluga gromobranske zaštite, uzemljenja i prenosa energije, u Turksoj.

Unutrašnji elementi Protector-a su nerđajući za koje snabdevači materijalima potvrđuju minimalni životni vek od 30 godina bez održavanja.

Svi gotovi proizvodi prolaze kroz postupak stroge kontrole kvaliteta pre isporuke kupcima.

Prema datim informacijama, DAMEKS može da konstatuje, da jedinice Protector od DLP sistema mogu da izdrže životni vek do 30 godina.

Ova izjava u potpunosti zavisi od ispravnog pridržavanja prema datim uputstvima za instalaciju i održavanje.

A to su:

- Godišnja kontrola i održavanje same Protector jedinice, pravilno uzemljenje i provodnički sistem.
- Pravilna instalacija prema standardima.
