

DUVAL MESSIEN

LA MAITRISE DE LA FOUDRE
HIGH TECH FOR LIGHTNING PROTECTION

TO WHOM IT MAY CONCERN

INSTRUCTIONS FOR CHECKING THE EFFICIENCY OF THE ESE SATELIT+ G2 ONCE INSTALLED

DUVAL MESSIEN is the oldest company in Europe in the field of earthing technology, since more than 100 years, coming then to the lightning protection business. Our ESE have been installed for many years in countries having tropical conditions, in Africa, Asia and South America.

All our products are inspected before delivery, in our laboratories.

In these conditions, we can obviously confirm our « SATELIT+ G2 » keeps its characteristics up to 25 years, following our estimations and experience, if it is properly installed and works in constant environment and acceptable pollution limits.

Means of controlling :

No special needs of checking after mounting.

- none for the « SATELIT+ G2 » itself
- installation of the whole french standard and checked regularly, especially the earthing resistivity.

Made in Chennevières, on August 27th, 2008

ONOME KOME MOŽE POSLUŽITI

UPUTSTVA ZA PROVERU EFIKASNOSTI
VEĆ UGRAĐENOG ESE SATELIT+ G2

DUVAL MESSIEN je najstarija kompanija u Evropi u oblasti tehnologije uzemljenja, od preko 100 godina, prelazeći na poslove zaštite od munje. Naši ESE se instaliraju već mnogo godina u zemljama koje imaju tropske uslove, u Africi, Aziji i Južnoj Americi.

Svi naši proizvodi su, pre isporuke, pregledani u našim laboratorijama.

Pri ovim uslovima, mi jasno možemo potvrditi da naš "SATELIT+ G2" zadržava svoje karakteristike do 25 godina, prema našim procenama i iskustvu, ako je instaliran i radi u nepromenljivoj okolini i prihvatljivim granicama zagađenja.

Sredstva kontrolisanja:

Nema posebnih potreba provere posle montaže.

- Za sam "SATELIT" : NE
- Instalacija celog sistema mora biti urađena u saglasnosti sa Francuskim standardima i propisno proveravana, posebno otpornost uzemljenja.

Chennevieres, 27. August 2008.
